VOLUME 31: No. 25

ACME, ALBERTA, THURSDAY, JUNE 26th, 1952

\$2.00 a Year; 5c a Copy

WE HEAR?

Jimmy Foster left on Friday last for Drumheller where he has accepted a job as second man in the Wheat Pool elevator.

Robin Hunt entertained a few of his young friends on Saturday afternoon, June 15 on the occasion of his third birthday.

Word has been received by Mr. and Mrs. C. Graham that Jimmy Graham has been posted to the R.C.A.F. Station at Sea Island, B.C.

A birthday party was held on Tuesday evening in the Legion Hall on the occasion of R. Garrett's 21st birthday. Square dancing and games were enjoyed by all.

Mrs. Henry Koopman and little daughter, Sharon of Los Angeles, California arrived Sunday by air to visit at the home of her parents, Mr. and Mrs. Richard Saylor.

Mrs. Ed. Foster left on Monday evening to visit her daughter who is in training at the hospital there.

We understand she is quite sick at the present time.

The Pee Wees are holding a Ball Tournament on Wednesday afternoon, July 2nd starting at one o'clock. Teams taking part are Beiseker, Newcastle, Carbon and Acme. Please try to attend. Lunch will be served on the grounds.

Findlay Code motored to Eastern Canada where he purchased a new 1952 Chev de luxe sedan.

Mr. and Mrs. W. Schacher and family motored to Medicine Hat for a few days, returning Friday evening.

Larry Poxon entertained a few of his young friends Monday afternoon on the occasion of his 3rd birthday.

The United Church Picnic was held on Wednesday afternoon, June 25 in Carbon Memorial Park Grounds.

The Baby Clinic will be on Monday, July 7th from 10 a.m. to 12 noon in the United Church hall.

Carbon defeated Ghost Pine 15-3 on Wednesday evening. All due to our new right fielder, so he says.

The Square Dance Club No. 44 held their final jamboree on Friday, June 13 with a grand turnout. This, we understand, is the final evening till the dancing resumes again in the fall.

A beautiful community shower was held in the local hall on Saturday, June 14th in honor of Miss Shirley Saunders, bride elect of this week. The evening was spent in contests, etc., after which the bride was taken to a beautiful pink and white wishing well which was fully loaded with beautiful gifts. The evening closed with a very delightful lunch served by the hostesses of the evening, Mrs. Leon Coates, Mrs. Mary Prowse and Mrs. McLeod.

Following are the trap shooting scores for Wed., June 19th, all scores out of 25 shots:

G. E. Schell.....	13
G. W. Schell.....	19
W. Wright.....	13
Art Humphrey.....	22
Les Bramley.....	13
G. Eslinger.....	21
Dave Gieck.....	17
Ben Schuler.....	11
Art Buyer.....	15

Every Wednesday evening the Fish & Game hold their trap shoot down by the local elevators.

TENDERS INVITED for the purchase of the following in the Avondale School District No. 1775.

1. Site.
 2. School Building.
 3. Barn 18x16 ft.
 4. Storage Barn 18x14 ft.
- Buildings to be removed from grounds unless purchased by purchaser of site.

Tenders to be opened and considered Friday, July 11, 1952.

Envelopes to be marked **Tender**. Highest or any tender not necessarily accepted.

READ SIGNS OF LIFE HEED

Make Observance of Traffic Signs a Habit

1. Regard and obey, all traffic control devices as though they were flesh-and-blood policemen.
2. Do not become careless on familiar roads.
3. Control your speed so you can read signs.
4. Stay on the correct lane and heed no passing zones.
5. Remember the STOP sign means a complete stop--not a mere reduction of speed.
6. Be sure all tracks are clear at rail crossings --a slow freight may screen a passenger.

Superstitions Of Indians Hinder Medical Work

NOREGG, Alta. — White man's medicine machine is fighting a stiff battle with Indian superstition among the Stony-Sacree Tribes in this sparsely-settled area in the Rocky Mountains 130 miles southwest of Edmonton.

Members of the tribes have refused to appear to collect their annual \$5 treaty money from the district Indian agent because of the x-ray machine and crew that comes with him. Superstition has made them so afraid of the x-ray machine that not even \$5 will induce them to "have their picture taken."

The superstitions may go back a long way, but as time progresses they are given added strength by the Indian's refusal to accept medical treatment before it is too late.

The Indian parents generally refuse to allow an x-ray for their children until the ravages of tuberculosis are all too obvious. Then another argument often ensues before they let their children go to hospital. By the time many receive treatment it is too late and they die in hospital a short time after admittance. Then the story is circulated that the children died because of the white men. The victim's death is never blamed on the Indian's reluctance to accept early and useful treatment.

Robert Battle, superintendent of the Stony-Sacree Indian Agency, said that on trips to the reservation without the x-ray machine the Indians are out at daybreak for their money.

On this last trip, Battle had to drive around the reserve and encourage the Indians to come to the schoolhouse to collect their money and "have their pictures taken."

By dint of much persuasion and fast talking, he convinced 35 of the 70 Indians on the reserve into submitting to the "ordeal" before the treaty-paying party left.

SELECTED

Recipe

CHEESE CORNMEAL FINGERS

Light, tender and flavorful—try them with a salad, with scrambled eggs or broiled bacon, for a real treat.

- 1 1/2 cups once-sifted pastry flour or 1 1/4 cups once-sifted all-purpose flour
- 3 teaspoons Baking Powder
- 3/4 teaspoon salt
- 3 tablespoons chilled shortening
- 1 cup yellow cornmeal
- 1/2 cup shredded Ingersoll processed cheese
- 2 tablespoons chopped parsley, if available
- 3/4 cup milk

Grease a cookie sheet. Preheat oven to 425 deg. (hot). Mix and sift once, then sift into a bowl, the flour, Magic Baking Powder and salt.

Cut in shortening finely; mix in cornmeal, shredded cheese and parsley, if being used.

Make a well in the flour mixture and add milk; mix lightly with a fork.

Knead for 10 seconds on lightly-floured baking board and roll into a 1/4-inch-thick rectangle; cut into 12 fingers and arrange, slightly apart, on prepared cookie sheet.

Bake in preheated oven about 15 minutes.

Serve hot, with butter or Blue Bonnet Margarine.

Yield: 1 dozen fingers.

Canadian farmers at the start of 1952 had a total of 3,513,000 milch cows and 770,800 dairy heifers.

More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome loose plate discomfort. FASTEETH, an improved powder, sprinkled on upper and lower plates holds them firmer so that they feel more comfortable. No gummy, goopy, pasty taste or feeling. It's alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTEETH today at any drug store.

Had Sores Over Legs Size of Silver Dollars

—In Misery for 20 Years—
Read His Thankful Letter

"Got my ankles and legs poisoned from sonora heat dust—tried everything—kept my legs bandaged for over four years—in misery for 20 years," writes Mr. G. P. of Star, Idaho. "Had sores over my legs the size of silver dollars. Saw Emerald Oil advertised and says to my wife, 'That's for sure less. I'll try it.' And glory be—the relief I got right away! We keep Emerald Oil in the house all the time for cuts and scratches. You can use my name if you want to. Thanks for the relief."

Thousands of bottles are sold every year to relieve just such cases of stubborn skin itching. Irritation and soreness. Stainless—greaseless—MOONE'S EMERALD OIL is highly concentrated and a small bottle lasts a long time. At drug stores everywhere.

MAY RUN FOR U.S. VICE-PRESIDENCY—Mrs. H. C. Houghton, who is retiring president of the U.S. General Federation of Women's Clubs, reported she has been approached as a possible Republican candidate for vice-president.

Funny and Otherwise

Marriage: The process by which the grocer gets an account the haberdasher once had.

"Frank, how would you describe a financial genius?" "A man, my dear, who makes money faster than his family can spend it."

The policeman raised his hand and the woman motorist stopped with a jerk. "As soon as I saw you, miss," the policeman declared, "I said to myself, 'Forty-five at least.'"

"Oh, no," remonstrated the woman, "it's this hat that makes me look so old."

A bachelor friend of mine has all the qualities that go to make a good husband but one. He will not propose.

A man had been trying to write a telegram with a pen provided by the post office. After two or three ineffectual starts he turned to the girl behind the counter and said, "Is this by any chance the pen used by King John at the signing of Magna Carta?"

The girl replied, "Inquiries on the right, please!"

A Hollywood producer received a story entitled "The Optimist". He called his staff together and said, "Gentlemen, this title must be changed to something simpler. We know what an optimist is, but how many other people know it's an eye doctor?"

Mrs. Jones packed away a packet of sandwiches in her husband's attache-case.

"Now, is there anything else you want, darling?" she asked.

"No, thank you," he answered. "But I shall be late home this evening. There's a Board meeting."

"Oh!" answered Mrs. Jones. "Then you'll be needing your darts!"

"Is that hair tonic any good?" "Well, I spilled some of it on my comb last week and now it's a brush."

Wolves Gobble Poisoned Bait, Says Supervisor

PRINCE ALBERT, Sask.—The death knell is being tolled on northern Saskatchewan's predatory wolf packs.

After years of unsuccessful combat against the wolves, the Saskatchewan game department last winter introduced poisoned bait. The result—154 dead wolves. The surprising thing was the wolves like the poisoned bait. They gobbled it up.

Harold Read, game supervisor at Prince Albert, announced some of the findings after the winter-long campaign against the animals.

He found that of the 41 bait stations set up the most effective were in the path of migrating caribou. Those outside the area accounted for only a few wolves.

In the caribou area 17 wolves were killed at one station and the average "take" was nine.

It was thought that wolves would shy away from the cyanide and strychnine-poisoned bait, but this was unfounded.

"The wolves rubbed up against the trees, often chewed off and played with the warning signs and literally gulped down the baits," Mr. Read said.

The annual toll of caribou, deer, elk and moose killed by wolves has been placed as high as 50,000. Provincial game officials are considering poison campaigns every winter.

World sheep numbers at the beginning of the year were estimated at 803 million, three per cent. above the previous record of 782 million in 1948.

ANIMAL DISEASE DOES NOT RESTRICT TRAVEL IN CANADA

REGINA.—Addressing the last social-business meeting of the season for the Regina chamber of commerce, Alex Aitken, manager, deplored the prevalence of rumors in the United States of restricted Canadian travel due to foot-and-mouth disease.

"We have done everything possible to combat these rumors. We have sent letters to many newspapers in the nearby states and also used radio stations there," he said. "It's very important for our tourist trade that we stop these false rumors."

At the Forest Nursery Station, Sutherland, Sask., 40 acres of tree seedlings, mostly caragana, have been planted for future distribution.

Peace Reigns Again At Duck Haven

PORTAGE LA PRAIRIE. — Jim Inglis, superintendent of Island Park, believes that great horned owls have a place in nature's scheme—but that place isn't among the ducks in his park sanctuary.

Four predatory-minded owls learned this in fatal fashion recently when they dived on ducks just released on an ice-rimmed park pond. A few casualties occurred before traps could be set.

One of the persistent predators, snared as it pounced on a duck and pulled down by the trap as it tried to rise in the air with the wildfowl clutched in its talons, dropped the duck. All four raiders were eventually trapped and peace reigned again in the wildfowl community.

No end of surprises with MAGIC!

PEANUT BUTTER PINWHEEL LOAF

Mix and sift into a bowl, 3 c. once-sifted pastry flour (or 2 1/2 c. once-sifted hard-wheat flour), 5 1/2 tsp. Magic Baking Powder, 3/4 tsp. salt. Cut in finely 7 tbs. chilled shortening. Combine 3/4 c. milk and 1/2 tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly with a fork. Knead for 10 seconds on lightly-floured board and roll out to 1/2" thick rectangle, 8 1/2" along one side. Cream together 1 tbs. butter or margarine, 1/4 c. peanut butter and 1/2 c. lightly-packed brown sugar; sprinkle on rolled-out dough. Beginning at an 8 1/2" edge, roll dough up like a jelly roll and place in a greased loaf pan (4 1/2" x 8 1/2"). Bake in a hot oven, 400°, about 45 minutes. Serve hot, cut in thick slices, or cold, cut in thin slices, lightly spread with butter or margarine.

Delicious INGERSOLL Cheese

...the ideal centerpiece for your "Party Spread"!

Your whole family will love this delicious blend of fine Canadian cheddar. Ingersoll Baby Roll Cheese is smooth and mild with just enough tang to make it a special favorite with the menfolk. Adds grand flavor to snacks, apple pie and hot cheese dishes. Ideal size for sandwich slices, too.

Be sure you get genuine INGERSOLL Baby Roll.

Ingersoll Baby Roll is a product of over 60 years experience in making fine cheese. That's why you enjoy that extra good flavor when you ask for Ingersoll.

PEGGY

HI, THERE, DICHES! HOW DID IT GO TODAY?

Peggy

WISH I WERE DEAD!

WHAT'S WRONG WITH PEGGY?

OH, THAT!... WELL, SHE'S PRESIDENT OF THE LOCAL GREGORY PECK FAN CLUB...

...AND SHE FORGOT HIS BIRTHDAY!

—By Chuck Thurston

Rain-Making Again Is Big Project For Western States

DENVER, Colo.—Rain-making again is a big thing this year in the western United States. Around 200,000,000 acres already are targeted for rain-making so far this summer. Projects last summer covered something like 300,000,000 acres. Predictions are for a 1952 summer total of 400,000,000 acres.

Weather modification efforts cost an estimated \$2,000,000 to \$3,000,000 last year.

If, as some say, the average cost of rain-making is a cent an acre, this year's work would be \$4,000,000 for 400,000,000 acres.

Those who pay for weather modification—farmers, ranchers, power companies and communities—appear to be considerably more selective this year. They still want attempts made to increase moisture fall. But things seem calmer than in last year's big rush.

Seeding methods remain about the same. Dry ice, silver iodide and other compounds are spread from planes and ground generators.

No one knows for sure whether rain or snow has been increased in vast reaches of the west as result of cloud seeding.

Colorado A. and M. College and Oregon State College investigators undertook some checking and concluded in general there was no ap-

parent increase in precipitation or significant departure from normal in the projects studied.

However, the studies were comparatively short term. Meteorologists, physicists, rainmakers and those who back the projects want long-range studies to evaluate results. Some already are under way.

"The greatest need is comprehensive study, based on sound scientific principles, which will determine the practical possibility and make available for publication, without bias, the record of failures as well as successes in cloud seeding," said Dr. Harry Wegler of the U.S. Weather Bureau.

Dr. Vincent Shaeffer, general electric research chemist whose experiments set modern-day rain-making in motion, sounded a middle-of-the-road view:

"Now it will be up to the farmer, I think . . . whether or not we just have another experience like we have had so many times in the past when so-called rainmakers would drive up with their covered wagon . . . start out some evil-smelling chemicals, and then take credit for anything that might happen along about that time.

"I personally think we are beyond that stage. I think we know enough about precipitation mechanism that if we want to, we can eventually do most anything we want with the weather (but) . . . we are not going to get very far unless every one is willing to go at it in the right way."

GEMS OF THOUGHT

NOBILITY

Be noble! and the nobleness that lies in other men, sleeping, but never dead, Will rise in majesty to meet thine own.

—James Russell Lowell.

There is a saying of the ancient sages:

No noble human thought, However buried in the dust of ages, Can ever come to naught.

—John Godfrey Saxe.

* The sublime summary of an honest life satisfies the mind craving a higher good, and bathes it in the cool waters of peace on earth; till it grows into the full stature of wisdom, reckoning its own by the amount of happiness it has bestowed upon others.—Mary Baker Eddy.

No man can ever be noble who thinks meanly or contemptuously of himself and no man can ever be noble who thinks first and only of himself.—W. H. Dallinger.

Think truly, and thy thoughts Shall the world's famine feed; Speak truly, and each word of thine Shall be a fruitful seed; Live truly, and thy life shall be A great and noble creed.

—Horatius Bonar.

Who is well born? He who is by nature well fitted for virtue.—Seneca.

40 Spinsters Arrested For Failure To Wed

ACCRA, Gold Coast, West Africa.—Forty spinsters have been arrested in the Adansi native state for not getting married.

In April the state native authority, self-governing under British colonial rule, put the girls on one month's notice and reduced the marriage fee to five shillings.

The forty failed to find mates willing to wed even at such a bargain price.

Four other native states have announced it's wedding or jail for unmarried females.

HERE'S HEALTH

Whooping cough, diphtheria too

Do not need to trouble you

If your child has been protected

And immunization not neglected.

Dept. of National Health and Welfare

QUEEN MARY, who has seen six reigns, two World Wars and vast social changes in a lifetime spanning the Victorian, Edwardian and Georgian periods, celebrated her 85th birthday Monday, May 26th. Since the King's death, Queen Mary has allowed the pace of her life to slacken only slightly. She still follows current affairs with close attention and has started embroidering another carpet, similar to that bought by Canada's Imperial Order of the Daughters of the Empire.

Says Worry-Free Mind Needed For Safety On The Highways

TORONTO.—Mrs. D. J. McArthur, of Hawkestone, Ont., whose husband operates an Ontario Highways Department snowplow in winter, has won an essay contest with the theme that a worry-free mind is needed for highway safety.

The contest was sponsored by the Motor Vehicles Safety Association of Ontario. Mrs. McArthur's essay was intended to show how wives can help husbands who operate motor vehicles for business or pleasure come home in peace, not pieces.

The Simcoe County farm wife, born in Helsinki, Finland, will receive her prize at a dinner.

"A husband needs to go off to work happy and content both mentally and physically, secure in the knowledge that everything is fine at home," she wrote. "Then he can put his heart and mind to his job. Only when his mind is free of worries can he think clearly and quickly."

She offered this recipe for a happy marriage:

"Put your husband first. Let him know he is the lord and master of his house and not just the man that brings home the pay and supports you. Try to understand your husband and see things from his point of view. When the occasion arises that you feel you must differ from him on matters that are really im-

portant, wait until he is rested and in the right frame of mind. After the disagreement, be the first one to make up. It hurts a man's pride to admit he was wrong."

STANDARD BRIDGE

by M. Harrison-Gray

Dealer: West.

North-South game.

E. 6 5 2
K Q J 5 2
S. 4 3 2
K Q J 5 2

West opened One Diamond on this hand from rubber Bridge, and North's pass was on the conservative side—an overall of One Spade might have led to some interesting play in Three No-Trump by South.

In practice One Diamond was passed round to South. Since a mere One Heart would be inadequate in this position, he reopened with Two Hearts. West passed and North's Two Spades suggested the type of hand that he actually held with a point or two less. South should have passed but tried Three Clubs which bought the contract.

West led ♠ A followed by ♠ 3. South placed East with four trumps and finessed ♠ 9 after cashing ♠ K. He drew the last trump and played ♠ A and ♠ 9. West cashed ♠ K and ♠ A but South took the rest.

HOW WORD ORIGINATED

The word "budget" comes from the name for a bag or pouch in which the English chancellor of the exchequer carried his statements of accounts to the House of Parliament.

ODDITIES In The News

During a labor shortage, the Labor Temple of Memphis, Tenn., bought a mule to keep the grass on their lawn "eaten down".

A 63-year-old widow of Syracuse, N.Y., exercised the traditional female right to change her mind. She returned an unused marriage license to the city clerk's office with the explanation that "We thought it over and decided not to get married."

Miss Fox of Gaffney, S.C., became Mrs. Moose. Probate Judge W. R. Douglas married Rome Joel Moose to Dorothy Lucille Fox, both of Statesville, N.C.

Two policemen and several reporters were on the scene three minutes after the hold-up alarm sounded from the cashier's office at the bus depot at Vancouver. Mary Francis Daniel explained "I dropped my cash drawer on the alarm button."

At Wilmington, Calif., old Tug No. 10 was a real tough and harbor-worthy vessel. It had hauled in some big ships in its day. However, No. 10 was cast in a new role—towing a floating barge for a style show, with a score of cuties tramping the deck as they modelled swim suits, and bra and panty sets. This was just too much for old No. 10. After getting back to its dock it capsized and sank.

For weeks a learned correspondence was carried on in the London Sunday Times on double-yolked eggs, lengthened by introduction of a triple-yolked egg. The discussion reached a peak when a man wrote from Woolton, Lanc., to say he recently ate an egg with four perfectly formed small yolks.

The father of the bride in Toronto is unhappy. He thought a cardboard box in his hall contained garbage. He tossed it out. It held his daughter's bridal shower gifts. "It was a mistake," he told his wife. "It was a mistake," he told daughter. "It was a mistake," he said pleading with civic officials at suburban Scarborough to search their garbage disposal plant. Garbage—and gifts—have long since disappeared into the civic incinerator.

TREES SOUND ASSET

PETERBOROUGH, Ont.—This city is spending \$6,800 a year on trimming, planting and caring for the trees that line its streets and dot its parks.

In addition its Utilities Commission usually spends \$1,000 a year in trimming and removing trees.

Since 1915, when it passed a by-law for the protection of trees, the community has considered its trees a valuable asset.

Every year the Parks Department plants about 500, mostly maples but with a few birches for variety. Some pines and spruce are also in park areas.

Civic officials say the roots of maples do not plug up sewers as much as do those of other varieties.

That's why the bylaw prohibits the planting of certain trees including poplar, balsam of gilead, cotton-trees, willows, catalpa and mountain ash.

THE OWLS EYES

The eyes of an owl are fixed in bony sockets and directed forward. Because of this the owl is able to see only what is directly in front of its head.

THE CANAL THAT SPLITS EGYPT

—Little, in The Nashville Tennessean.

On The Side : By E. V. Durling

There are quite a few people who want to put on some weight. It is more difficult for this type of person to add weight than it is for plump people to take off weight. Yet they, the thin people, are almost totally neglected by the diet experts. One time Jimmy Stewart, the elongated cinema luminary, was trying desperately but unsuccessfully to add a few pounds to his frail frame. Finally he went to a world-famous diet specialist. This specialist told him to drink eight ice cream sodas a day!

Challenge Column

A London newspaper runs a "challenge" department. In this, space is given to anybody who wants to challenge anybody else to any kind of competition. For example, a 70-year-old man challenged any man of his age to compete in a 100-yard dash. A golfer challenged anybody to meet him in a one-club match. That is, to play using only one club. Then there was a challenge by a family of man, wife and two children to meet any similar family in England in a relay swimming race.

Fat Men Are Loved

The claim "nobody loves a fat man" is definitely erroneous. The novelist Balzac was a fat man. As a great lover Balzac was in the same class as Byron and Casanova. He figured in innumerable romantic interludes. He received many fan letters from feminine admirers. Three of his five major romances originated that way. The writers were all beautiful, highly intelligent women. As for example, Eveline Hanskay, who was 32, of the Polish nobility and the wife of a millionaire. She had no idea what Balzac looked like until she met him in Switzerland. That he was a short, fat man made no difference to her. Balzac was stolen from Eveline by a Parisienne who was one of those dazzling ash-blondes. Anyway, it is as I have stated. Many beautiful women fall for fat men. So, sir, if you are a little overweight don't be discouraged. You too, can be a great lover.

Intelligence and Stupidity

Intelligence and knowledge are often confused. Many educated men are not very intelligent. We all know stupid college graduates. Intelligence is the ability to get the most out of what you know. As a class the most intelligent men are the mechanics.

Era of Opportunity

If you can't figure out an invention, why not turn your thoughts to originating a way to make it possible to sell a popular product at a lower price than is now the practice? That is, of course, what Henry Ford did. A more recent example is a man who originated a method of making a harmonica so it could be sold for a price much less than that charged by other manufacturers. This man has become a millionaire within the past six years.

Maybe There's Something To It

Do you know anybody who is the seventh child of a seventh child? Is he or she unusually lucky? Mrs. Lillian Guest, the Englishwoman who recently won several British football pools, including one worth \$200,000 (tax free), is a seventh child of a seventh child. Mrs. Guest says she has been lucky all her life, including being lucky in love.

**Eight-Year-Old
Child Makes 7,490-
Mile Trip Alone**

★ ★ ★ ★

TO COMPLETE 7,490-MILE TRIP—Little Snefrid Ax, eight, of Oslo, is shown arriving in Montreal from Halifax to complete more than half of her unaccompanied 7,490-mile sea and rail trip to join her parents. They moved from Norway to Quesnel, B.C., last January. The little traveller here receives her passport and other papers from P. E. Salomonsen, of the C.N.R. Colonization and Agriculture Department. She covered 4,000 miles of the journey by ship and will travel 3,490 miles by train.

COMMUNISTS SLOW BERLIN LIFELINE—One of the latest Communist "needling tactics" in the East-West war of nerves is to harass traffic on the Berlin-Helmstedt autobahn, the 120-mile-long lifeline between West Germany and West Berlin. Without any reasons whatsoever, Communist police will suddenly slow down the clearance of freight trucks going to West Germany or bringing goods into West Berlin. While other traffic moves normally, supply trucks often have to wait as long as 12 hours before being allowed to proceed past the Communist checkpoints. In this photo, West Germany-bound trucks which have been cleared through the United States checkpoint already, accumulate in front of the Communist checkpoint. Photographers are not allowed to proceed past the American checkpoint since the Soviet zone begins right behind the American checkpoint.—Central Press Canadian.

ELECTION WAS A BATTLE OF POSTERS—The election campaign in Italy was for the most part with posters, each side trying to outdo the other in fantasy and dramatic impact. Here is one big poster, erected in famed Piazza Venezia by supporters of Premier Alcide de Gasperi's Christian-Democratic party, arch foe of the Communists. It depicts the Red monster of communism ripping the Vittorio Emanuele monument apart.

SAIL ATLANTIC SANS FOOD, WATER—Dr. Jacques Palmer, (left), an English engineer, and Dr. Alain Louis Bompard, are shown aboard the fragile life raft on which they are attempting a voyage from Monaco to Cuba. Seeking to prove that shipwrecked persons can survive at sea, Palmer and Bompard left Monaco on May 24th, with their only luggage being a small radio, a sextant, a mast and a spare sail. They'll carry no food or water with them and said they'll find their food at sea and drink salt water. They estimate that the journey will take two months, and their route takes them to Cuba by way of Gibraltar and the Canary Islands. The rubber raft measures 20 feet by four feet.

HELD AS HOSTAGES IN JUNGLE CRASH—Scott Magness (shown with his wife), civil aeronautics authority from Miami, Fla., found himself held as hostage by a party of presumed rescuers after the plane he was in had been forced down in the Brazilian jungle. Thirty parachutists dropped to the scene of the wreck, then when government planes arrived the parachutists held Magness prisoner until they were assured they would be taken out of the jungle too. Rumors of a million-dollar jewel shipment aboard the plane have added a suspicion of looting.—Central Press Canadian.

REVIVAL OF DIPLOMACY IN JAPAN—Impeccably clad in a diplomatic uniform, Sir M. Esler Dening, Great Britain's ambassador to Japan, leaves an ornate horse-drawn coach in Tokyo. He was on his way into the Imperial Palace to present his credentials as first British post-war ambassador following the resumption of diplomatic relations with the Japanese.—Central Press Canadian.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

How To Judge "Pace" In Track

If you run any race longer than the 220, you must learn to judge how fast you are running. This is what "pace" means... the degree of speed with which you are running. You see, there is an ideal "pace" for each event and you must learn to know when you are running at this speed. Then, you will be able to work out a really effective racing strategy, something that you must have in any event over the 220.

After you have developed "condition" by the proper preliminary training, spend lots of time testing your "pace" over a 220 yard limit. When testing, start the "pace" you are going to use right at the start, don't sprint at first. Once you have run four or five 220's in a row at the "pace" you want, start practising over the 440 distance. Run at a steady, even "pace" all the way through and have your coach or pal call out the time every 110 yards.

If you are trying for a 60 second "pace" you should hit the first 110 yard mark at 15 seconds, the second at 30, the third at 45 and the finish at 60. If your coach calls out "16 or 17 seconds" at the first mark you should speed up a little by "shoving" harder off the toes and by lengthening your stride, with more "body lean". If he calls out a figure below 15, slow down a little by eliminating some of the "shove" off your toes. If you run enough of these "pace tests" you will soon develop a "sense" that will let you know instantly when you are not running at the "pace" at which you want to run. If you prefer you can do your own timing, holding a watch in your hand and checking at each 110 yard mark.

Remember, you must learn at what "pace" you are running if you are to become a good runner. So, work extra hard on this phase of your running.

How To Catch Fly Balls

When catching a high fly always take it above your head or at your head level. Then, if you fumble it, you still have a chance to make another grab for it.

If the fly is very high, go back a few steps, judge it and then move forward and take it. Never stand still when in doubt.

Finally, remember to bring your hands back a little with the ball as it reaches you. Don't grab at the ball or hold your hands stiff. Let it come, keep cool and don't tighten up—keep your muscles relaxed!

The Rag Doll Dance

Here is an ideal drill which will teach you to loosen up and help you get rid of that pre-game tension and anxiety.

Jog in a stationary position, keeping your whole body as relaxed as possible. Let your head, shoulders, arms and hands dangle as loosely as you can—let your mouth hang open too. Then bounce on one foot and try to let the other leg dangle loosely—alternate with each leg. Do this for at least 2-3 minutes. This drill will teach you the difference in feeling between relaxation, and tension. Always finish your work-outs with it.

For the latest information on how to get into better shape for that coming sports season, how to improve your general health, increase your skill in sports, and many other items of interest to you, make sure you listen to the Sports College radio broadcast every Saturday. To get the time of broadcast consult your local newspaper.

NATURAL WEALTH

Medicine Hat in Alberta owes its growth and prosperity to abundant deposits of natural gas, first discovered there in 1883.

Weekly Tip

WASHING LETTUCE

A quick and easy way to wash a head of lettuce and separate the leaves at the same time is to cut out the white "core" or stem at the base of the head; then let the water flow in.

World Happenings Briefly Told

Rory McCormick, a pick-and-shovel pioneer who helped build the Canadian Pacific Railway through the Rocky mountains to the Pacific coast, died recently in Ontario. He was 102.

New life insurance protection put in force by Canadians in the 50-odd British, United States and Canadian companies operating in Canada amounted to about \$194,000,000 during the month of April.

The House at Port Royal in which Admiral Lord Nelson lived 170 years ago was destroyed by fire in Kingston, Jamaica. The building at the famous old pirate town had been used recently as a school.

Canada recently released an additional \$41,000,000 (Canadian) to the World Bank, to be loaned to member countries at the bank's will. The step made Canada the second country among the bank's 51 member countries to release, in effect, its full quota of capital for bank loans.

Kitchen Meditations

By JANE DALE

LOST — A BOY!

He wasn't lost in the woods one day; nor by kidnappers stolen away. He wasn't taken by some dreadful ill—in fact, he's alive and with us still!

"Too busy," was dad to listen awhile, or to take him walking a long merry mile.

"Too busy," to know a boy's restless heart—so he lost his son; now they're miles apart.

"Too busy," was Mom, with her bridge and her cares to take time to listen to a small boy's prayers.

"Too busy," to cherish a lad's urgent need of a guiding hand—so she lost him indeed.

"Too busy," the church, with its words to the wise; it couldn't see life through a young boy's eyes.

It put greater store by its patrons gray, so gave little heed as a boy slipped away.

And so he was lost—he's your boy and mine. Lost—when he could have been made something fine.

"Too busy," how sad, as the years quickly sped. Now we'd give all we have if those words were unsaid!

PRISCILLA'S POP—Mr. Fixit

—By Al Vermeer

FIRST AID

First Aid is just what the two words imply, namely the earliest possible intelligent aid or help given to the victim of an accident or sudden illness. This aid is usually of a temporary nature only, to be given at once, at the scene of the accident or sudden illness and before a doctor is available to assume responsibility.

INFECTION

Infection of wounds is due to the presence of germs in the wound.

Germs are of many varieties but most of them do not produce disease or infection in humans. Germs are found everywhere; on our skin, in our throats and noses, in our intestine, and in the soil of roads or fields when contaminated with manure from horses and cattle.

Germs are so small they can be seen only with powerful microscopes. Under favourable conditions they multiply rapidly and attack the tissues especially if these tissues are wounded or diseased.

Germs are killed by heat (boiling or baking) or even by prolonged exposure to sunlight.

Germs will lie dormant if exposed to cold and freezing but will again become active when thawed out.

The germs which infect wounds are easily grown in the laboratory in test tubes into which is placed broth or jelly for food and then put into an incubator for body heat. The germs commonly found on our skin and in our noses and throats will grow in the presence of the oxygen in the air.

The Germs of Tetanus (lockjaw) and Gas Gangrene which are found in the soil of roads and manured fields will not grow unless protected from the oxygen in the air.

Living tissue with an adequate circulation of blood will resist invasion by germs. Dead or damaged tissue in a wound invites invasion by germs, providing food and body warmth just as does the test tube in the incubator.

Therefore cleanly cut wounds should not become infected, but lacerated wounds with much damage to tissues, and punctured wounds that collect blood which cannot escape are very liable to develop severe infection.

Signs and Symptoms of Infection in Wounds

A wound may become contaminated with infecting germs at the time of wounding, or at the time of dressing the wound, from infected spray from the mouth or nose of the First Aider. The First Aider should not talk while dressing the wound and of course should not cough or sneeze.

There is an interval of several hours before the germs multiply and attack the tissues. Then the wound becomes painful, throbs, swells, reddens and feels hot. Red streaks may appear in the skin leading from the wound.

If in the leg the groin may become painful and tender. If in the arm the armpit may show the same.

The victim becomes sick and feverish.

As there is no way of accurately measuring the strength of the infecting germs or the resistance of the victim to the germs the First Aider should get the victim under the care of a doctor without delay.

First Aid for Infected Wounds

Where a doctor is not available and a wound shows signs of infection.

1. Elevate the wounded part and keep it at rest.

2. Apply comfortably hot compresses wrung out of boiled salt water (a teaspoonful of salt to a pint of water). Compress should be sterile or clean.

3. Encourage the victim to drink large quantities of water.

4. Communicate with the doctor as soon as possible.

ELEPHANT WINS TUG-OF-WAR

DURHAM, England.—An elephant defeated a team of local university students in a tug-of-war. The umpire, a university professor, said "calculations must have gone wrong somewhere" as the elephant tugged the eight students across the arena.

History Highlights Recorded In Papers Of Three Centuries Ago

CALGARY.—A fascinating treasure of great historical value—a collection of newspapers dating back to 1588—was unearthed here recently when George Michael of Calgary examined his father's effects. The papers, wrapped in tattered brown manila, had belonged to his father, George Michael of Mossburn Inn, Harwick, Scotland. He died last year at the age of 85. Mr. Michael brought the effects back from Europe.

The earliest paper was a copy of the English-Mercurie dated July 23, 1588. It described the battle of the Spanish Armada. An extract reads: "Capt. Fleming, who has been ordered to cruise in the chops of the channel, for discovery, brought advice into Plymouth that he had discovered the Spanish Armada near Lizard."

The Intelligencer for the week ending Feb. 5, 1649, reads: "Tuesday, Jan. 30th—this day the king was beheaded over against the banquetting house, Whitehall. . . I (King Charles I) go from a corruptible to an incorruptible crown, where no disturbance can be."

The Newes of July 6, 1665, a copy issued during the great plague, contains the following passage:

"That every house visited be marked with a red cross of a foot long in the middle of the door, evident to be seen and with the printed words, that is to say, 'Lord Have Mercy Upon Us'."

Apparently all contacts with infected houses were to be confined in their homes for 20 days.

A copy of the London Gazette for Sept. 3, 1666, describes the beginning of the Great Fire of London.

"On 2nd Instante, at one of the clock in the morning, there hapnd to break out a sad and deplorable fire in Pudding-Lane near New Fish street which . . . spread itself so far before day . . . that care was not taken for the timely preventing the further diffusion . . . It fell out most

unhappily too, that a violent easterly wind fomented it."

An issue of The Times for Jan. 26, 1793, prints the following words in a letter from a spectator of the execution of Louis XVI of France:

"His Majesty then said: (I pardon my enemies. May my death be useful to the nation.) The executioner then placed him to be beheaded. The king recoiled and said: 'Another moment that I may speak to the people.' The aide-de-camp to the commandant, Sauterre, then said to Henri Sanson, the executioner, 'do your duty'."

Also included in the collection are copies of The Gazette for 1658, giving an obituary on the death of Oliver Cromwell and The Times of July 3, 1797, giving an account of the execution of Richard Parker, leader of the mutiny off the Nore.

The Times of Oct. 8, 1789, publishes the dispatches of the Battle of the Nile and that of Nov. 7, 1805, prints an editorial on the Battle of Trafalgar and Nelson's death.

Use Grain Combines In Rice Fields

WINNIPEG, Man.—Canadian grain combines, suitably adapted, are harvesting Colombian rice fields with considerable success, according to H. W. Richardson, former Canadian trade commissioner for Columbia and Ecuador.

Richardson told local business men about 300 machines were in service in the South American country.

Colombia and Ecuador were important to Western Canada, he said, because their principal imports were wheat and flour. Other imports from Canada included newsprint, aluminum, wire cable, asbestos and sewing machines.

Richardson was in Winnipeg on a cross-country trip before leaving for a new post in Europe and conferred with businessmen in the major cities of the dominion. The Canadian government, he said, is the only one in the world to provide this service for its businessmen.

NEW CHAMPION

British Hen Passes Saskatchewan Held Record Of Egg Laying

CHICHESTER, England.—A hen named Duplicate smashed a 25-year-old world record when she delivered her 360th egg in 159 days on Fisher Farm at North Mundham, near here.

Duplicate, aged 10 months, becomes world champion egg-layer, a title held since 1927 by Lady Victorine, a Canadian hen owned by the University of Saskatchewan.

"Lady" laid 358 eggs in 365 days. Duplicate, a North Holland Blue, began to attract attention early this year by her phenomenal laying feats. In one week she produced 26 eggs, nearly four a day. One every 18 hours is considered good going even among the best layers.

Her fame spread and earlier this month she became a television performer when she was "interviewed" after beating the British egg record.

Mrs. Wilfred Hutchings and her farmer husband were flooded with congratulations when Duplicate laid her 360th egg. Even Duplicate joined in the celebrations—she laid another.

MAKES CAR LAST

SHELBY, Miss.—Mrs. Lottie Turney's automobile is 16 years old but she's never spent a nickel for motor repairs. She's driven only 31,000 miles and never been more than 65 miles from home.

APPETIZING RECIPES

Here's an appetizing, hearty supper salad that's stocked with minerals and vitamins. It's made up of Tomato Aspic, slices of Ham and Egg Loaf, and a Carrot Salad, each nestled in a crisp lettuce cup. Served with Cheese Biscuits and good, hot tea or coffee, it's fine fare when you are having guests.

HAM AND EGG LOAF

Three ounces cream cheese, 1 three-ounce can deviled ham, 6 hard-cooked eggs, finely chopped, 2 tbsp. chopped parsley, 2 tsp. lemon juice, 1 tsp. onion juice, 1 teaspoon Worcestershire sauce, 1/2 tsp. prepared mustard, dash of tabasco sauce, 1/4 tsp. pure monosodium glutamate, salt and pepper to taste.

Place cream cheese in a bowl and mash with a fork; blend in deviled ham. Add all remaining ingredients; mix well. Line a 6 x 3 x 2-inch loaf pan with waxed paper; pack salad mixture firmly into pan, smoothing top of mixture with the back of a spoon. Chill over-night.

TOMATO ASPIC

One package lemon-flavored gelatin, 1 1/4 cups hot tomato juice, 2 tbsp. lemon juice, 1 tsp. grated onion, 1/4 tsp. Worcestershire sauce, salt and pepper to taste.

Dissolve gelatin in the hot tomato juice. Stir in remaining ingredients. Pour into 4 oiled individual molds or custard cups.

Chill until firm.

RAW CARROT SALAD

Two cups grated raw carrots use medium blade of vegetable shredder, 1/2 cup chopped celery, 2 tbsp. minced parsley, 2 tbsp. minced onion, 2 tbsp. chopped green pepper, 2 tbsp. minced ripe olives, 1/4 cup mayonnaise, 1 tsp. lemon juice, 1/4 tsp. pure monosodium glutamate, salt and pepper to taste.

Combine all ingredients in a bowl; mix well. Chill for several hours to blend flavors.

To assemble salad plate: Place 3 lettuce cups on each of 4 luncheon plates. Unmold Ham and Egg Loaf; remove paper; with a sharp knife, cut into 3 slices. Place 2 slices in a lettuce cup on each plate. Unmold Tomato Aspic and place a mold in another lettuce cup on each plate; garnish with a bit of mayonnaise and a sprinkling of paprika or chopped parsley. Heap some of the Raw Carrot Salad in the remaining lettuce cup on each plate. Serve at once. Serves 4. Delicious with hot cheese biscuits and iced tea or coffee for a luncheon.

Canadian Fashion

A COCKTAIL DRESS of champagne colored silk with banded neckline and brief sleeves of heavy corded lace. A new ribbon at the neckline, a velvet belt to match, other accessories, and this one dress becomes two.

Smile Of The Week

CORRECTION

In the grammar class, one day, the teacher wrote on the blackboard: "I didn't have no fun at the seaside." Then she turned around to her pupils and said to one: "Roland, how should I correct that?" "Get a boy friend," he answered.

Think Right—Live Right—Eat Right

"A Country Editor"

Have you ever considered why you see the "editorial we"? From the Addison (Vt.) Independent comes this reprint from a 100-year-old paragraph printed in the Williamstown Advocate.

It says:

"A Country Editor—is one who reads newspapers, selects miscellany, writes articles on all subjects, sets type, reads proof, folds papers, and sometimes carries them, cuts wood, works in the garden, talks to all his patrons who call, patiently receives blame for a thousand things that never were and never can be done, gets little money, has scarce time and materials to satisfy his hunger, or to enjoy the quiet of nature's sweet restorer, sleep, and esteems himself peculiarly happy if he is not assaulted and battered by some unprincipled demagogue . . .

"A man who does all this and much more, not here recorded, you will know must be a rather busy animal; and as he performs the work of so many different persons, he may justly be supposed their representative; and to have an indisputable right, when speaking of himself, to use the plural number, and to say 'we' on all occasions and in all places."

Helpful Hints

Your curtains and drapes will hang straighter if you sew weighted tape in the bottom seams.

Be sure all your wall sockets are provided with protective covers into which children cannot poke their fingers or metal objects.

A good method of bleaching sheets is to hang them on the line, and as quickly as the sun dries them, turn the hose on them. Repeat this several times.

If you hang slacks or trousers by the cuffs after washing, they will need little or no ironing. The weight of the wet garment "pulls" out most of the wrinkles.

"Quickie" Meals Are Easy To Prepare

Any career girl of necessity becomes an expert at preparing "quickie" meals. A busy friend says mushroom soup is her saving grace when guests arrive. She pours it on practically every meat dish, but has found it particularly tasty on pork tenderloins.

The uncooked tenderloin is cut in small pieces and browned in a frying pan. Then the mushroom soup, unthinned, is poured out of the can and on to the meat. Unstirred, it is popped into the oven to simmer slowly until the dinner hour.

She usually serves this with hot baked potatoes. Her second vegetable at this time of the year probably would be asparagus. A tossed salad completes the main part of the meal.

Jubilee guilds of Newfoundland and Labrador offer an interesting suppers called eggaroni.

Ingredients: two tablespoons butter; two tablespoons flour; two cups milk; one tablespoon horse-radish (if desired); two teaspoons minced onion; 4-6 hard-cooked eggs (quartered); two cups cooked macaroni; salt and pepper.

Melt the butter and blend with the flour. Pour in the milk and cook over a slow heat, stirring constantly until thickened. Add horse-radish, onion, eggs and macaroni. Season with salt and pepper. Serve on toast.

The jubilee guilds give the following hints for baking cakes and cookies:

1. Be certain the oven is at the proper temperature when the cake is ready to be baked.

2. A wooden spoon is more suitable for beating than a metal one.

3. Use fine granulated sugar. If coarse granulated or brown sugar is used it should first be pressed through a sieve.

4. Fruits should be thoroughly cleaned and dried. Cakes sometimes are made heavy by the use of moist fruit.

5. Sift the flour before measuring.

6. Place the cake near the centre of the oven and don't open the door until the cake is set (about 15 minutes).

7. Test whether cake is baked by pressing lightly with fingertips. If it feels firm and does not retain the imprint of the fingers it is baked.

8. To substitute cocoa for chocolate, use the following proportions: One square of chocolate—three tablespoons cocoa and one teaspoon fat.

9. Melt chocolate over hot water rather than over direct heat since chocolate burns easily.

Skim milk parties are becoming popular in Saskatchewan, says the Canadian Association of Consumers. When producers and distributors recently asked for an increase in the price of milk, women of the C.A.C. Saskatchewan branch, decided to promote the use of skim milk.

Teas were held when the uses of skim milk and skim milk powder were discussed and demonstrated. Skim milk was used in the cakes and buns served.

C.A.C. members found that powdered skim milk cost about 10 cents a quart mixed. They found it easy to use and to store.

Quick Canadian Quiz

1. What percentage of Canadians are urban dwellers?
2. Of Ottawa's estimated \$4,270 million spending this year, how much is for defence? How much is for social security?
3. How many Canadians live in the Yukon and Northwest Territories?
4. What one industry employed more than 100,000 Canadians last year?
5. By area, rank Canada, continental U.S.A., Brazil.

VIRGIL

By Len Kleis

OUR COMPLETE SHORT STORY—

Hello, Gorgeous

By ROY V. PRICE

Betty Had Seen Pat
Stripped of His
Conceit and Assurance

THROUGH the steam-clouded lunch-room window, Betty saw Pat by the gas pump showing the pistol to her father. Strictly big mouth! she thought, slamming the cast-iron skillet on the back of the stove.

"Hello, gorgeous! Just like I told you," Pat beamed, strutting in. "The firing pin in your old man's blunderbuss is worn short. But chances are you won't need it."

"Why aren't you at work?"

"Saturday afternoon. As usual, there's a dance tonight and, as usual, how about going with me?"

"As usual . . . certainly not!"

"I'll be here tonight to take you, gorgeous."

"No!"

"Wear that green dress you wore when you first knocked my eyes out with your beautiful face . . . and, ah . . . your gorgeous figure!" His face twisted up as he winked. "See you tonight, gorgeous."

"No!"

From the door, he threw her a kiss and she turned her back.

Since his crew started laying concrete a mile down the road, he had been coming in daily. She had seen plenty like him, but none quite so conceited! She'd even lain awake nights thinking of ways to take him down a notch. Just because he'd made All-State fullback and went around building roads in a loud red-checked shirt was no reason . . .

Late afternoon her father hung up the big sign, "No gas." He stuck his head in the door and said, "Hold it down, duchess. I'm going to town."

For no good reason, she thought of how the back of Pat's neck looked after a haircut.

A tall, well-dressed man entered. He slumped on a stool and ordered ham and eggs. He kept his hat pulled down low. Suddenly Betty froze before the stove.

From the radio on the shelf came the news: ". . . two service stations on route 1 robbed this afternoon . . . tall, well-dressed man . . ."

Mrs. Al Capp
Compares Blue Bonnet
— It's Her Favorite!

Accept an invitation from Mrs. Al Capp. Compare BLUE BONNET margarine with any spread at any price. Like the wife of the famous cartoonist, you'll love BLUE BONNET's fresh, sweet flavor . . . rich nutrition . . . real economy! BLUE BONNET is Canada's fine quality all-vegetable margarine. Use BLUE BONNET in cooking, on vegetables, as a delicious spread. Buy BLUE BONNET and get "All 3"—Flavor! Nutrition! Economy-e-e!

BLUE BONNET is sold in regular economy package with color wafer, also in the famous YELLOW QUICK bag for fast, easy color.

\$240,000 Flood Repairs

REGINA.—Dr. L. B. Thomson of Regina said that the federal government has approved an expenditure of \$240,000 to repair and restore all works on the Prairie Farm Rehabilitation administration in the flood area of southwestern Saskatchewan.

Rare Field Mouse

WADENA, Sask.—What is believed to be a rare type of field mouse was captured recently by Ewalt Schwanke on his farm in the Kuroki district. The tiny rodent was pure white in color.

Back In High Gear

CRANBROOK, B.C.—Lumber industry in Cranbrook district is back in high gear after spring closures ranging from two weeks to two months, due to road conditions. Some 300 to 400 workmen were affected.

323 Birds Banded

BALDUR, Man.—A total of 323 birds of 31 different species were banded in the last 12 months here, according to a report to the Canadian wildlife service. Most were easy to trap and release after banding—except one hairy woodpecker who fed at the station all winter and never entered the trap.

Just Stubborn

EDMONTON.—An Edmonton pedestrian found his way was blocked by four cars parked across a sidewalk outside a city garage. The garage proprietors refused to move the cars so the pedestrian walked over the tops of the four vehicles. The garage men called police. They were told they must not block the sidewalk. The pedestrian was told he must not walk on the tops of cars. The incident then was considered closed.

Alberta Pioneer Dies

RIMBEY, Alta.—Samuel Newton Rimbey, 84, the last survivor of three brothers who led a trek from Kansas to Alberta more than half a century ago, died here recently.

Vicious Dogs Captured

VANCOUVER.—Two vicious dogs were captured and killed when they returned to the scene of the crime—the chicken coop in which they had killed 155 birds. The marauders were a German Shepherd dog and a Sheep dog.

Cutworms Worry Farmers

WINNIPEG.—Cutworms have become widespread in southern Manitoba and are causing concern among farmers and market gardeners. Prof. A. V. Mitchener of the University of Manitoba said. He is head of the department of entomology. The pests' activity has been enhanced by recent dry weather which they prefer. Reports from Portage la Prairie said total loss has been suffered in some patches of as much as 50 acres.

\$10,000 For Bounties

EDMONTON.—The Alberta government is providing a sum not exceeding \$10,000 to the Alberta Fish and Game Association for bounties on predatory birds. Bounties will be 25 cents a pair for the feet of goshawks, horned owls and snowy owls, and five cents for crows and magpies.

Record Halibut Catch

PRINCE RUPERT, B.C.—The Ocean Pride of Vancouver arrived here with what is believed to be the record Canadian halibut fishing trip. Capt. Oisten J. Hansen reported he had brought in 100,000 pounds of halibut after "a week's mighty hard fishing".

The trip was the ship's maiden voyage to the halibut grounds. She was launched in Vancouver last Christmas.

Helpful Neighbors

NOKOMIS, Sask.—When P. M. Riffel, a farmer of the Nokomis district west of here died recently his wife, who remained on the farm, was not able to get any of the spring work done.

While she was in Regina, attending to funeral arrangements for her husband, kindly neighbors organized a bee and in a few hours seeded 190 acres of wheat on the Riffel farm.

MORE MUSTARD

BOW ISLAND, Alta.—Acreage set aside for commercial mustard has been increased by 10 per cent. in southern Alberta this spring. Altogether 500 acres have been seeded to mustard.

Lack of butter due to reduced milk supplies caused by the dry season, may make butter rationing necessary in Australia.

Sask. Provincial
Parks Facilities
Being Expanded

REGINA.—A fairly extensive program of expansion and improvement of facilities is slated for Saskatchewan's seven provincial parks this year.

New cabins, boats, electrification of buildings, improvement of golf courses and construction of fire-guards are included in this year's work program, as announced recently by A. Campbell, provincial parks director. Two of the major projects will be electrification of Cypress Hills Provincial Park and construction of a new clubhouse for the golf course at Kenossee.

A power line from Maple Creek will be built 25 miles south to the Cypress Hills park and, besides serving the park itself, will serve between 16 and 20 farms en route. This electrification project, Mr. Campbell said, is expected to be completed by the beginning of the tourist season.

At Kenossee, the new golf clubhouse will measure 24 by 34 feet, and will include lockers and a canteen. The clubhouse will be finished on the outside with imitation log siding and inside with plywood. Parking space at Kenossee will also be enlarged, and four more cabins will be converted to light housekeeping

ing cabins, bringing the total to 14.

At Greenwater Lake, four more two-room 16 by 20 cabins will be built, with imitation log siding and plywood finished interior.

At Madge Lake, plans call for the construction of 16 miles of new fire-guard, and improvement and seeding of four fairways on the golf course. A walk-in refrigerator will also be installed in the dining hall.

Throughout virtually all the provincial parks there will be considerable landscaping, painting, general repair work and improvement to buildings. New boats will be added at Madge and Greenwater Lakes, bringing the total number of boats available for rent at each to 35.

Queen To Honor
Edmonton Doctor

EDMONTON.—Dr. R. Graham Huckell of Edmonton will be presented with an award by Queen Elizabeth this summer while he attends a meeting in London June 29 to July 5 of orthopaedic surgeons from English-speaking countries.

He will receive the Canadian Orthopaedic Jewel from the Queen for his work as president of the Canadian organization. It will be the first time the Jewel, decorated with the fleur-de-lis and the maple leaf, has been presented.

Think Right—Live Right—Eat Right

HOT ROLLS double-quick!
with wonderful new fast-acting DRY YEAST!

PARKER HOUSE ROLLS

Measure into large bowl, 1 cup lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Scald 1 c. milk and stir in 5 tbs. granulated sugar, 2½ tps. salt; cool to lukewarm. Add to yeast mixture and stir in ½ c. lukewarm water. Beat in 3 c. once-sifted bread flour; beat well. Beat in 4 tbs. melted shortening. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough in bowl, grease top and let rise again until nearly doubled. Punch down dough and roll out to ½" thickness. Cut into rounds with 3" cutter; brush with melted butter or shortening. Crease rounds deeply with dull side of knife, a little to one side of centre; fold larger half over smaller half and press along fold. Place, touching each other, on greased pans. Grease tops. Cover and let rise until doubled in bulk. Bake in hot oven, 400°, about 15 minutes.

● No more spoiled cakes of old-style yeast! This new Fleischmann's DRY Yeast keeps fresh in your pantry! And it's fast-acting. One envelope equals one cake of fresh yeast in any recipe.

THE TILLERS

—By Les Carroll

New Library Opened

An important achievement in the history of Carbon was marked Saturday when the new Community Library sponsored by the Home & School Association was opened for public inspection. Mrs. Benjamin For, newly elected H.S.A. president, received the guests, and girls of

the high school assisted in serving.

Presentations were made by Rev. J.G. Rott, on behalf of the Association, to Mrs. Dick Sherring, one of the Carbon school teachers who has done a great deal to assist in the library project, and to Mrs. John Gordon and Miss Theresa McLellan, two of the teachers who also have been active and are leaving the school.

The Library Project, which was begun less than two years ago, has had the assistance of all members of the community. A building situated on the main street was purchased by the Association, remodelled and redecorated almost entirely by volunteer labor. Pastel colors, a most attractive window and bookshelves of different colors make it one of the most attractive small libraries that could be

found anywhere.

The Duke of York Chapter I. O. D. E. donated drapes which add greatly to the homelike atmosphere.

A good start has been made in the collection of books with nearly 500 volumes donated by people throughout the district already on the shelves.

The tea and many contributions from citizens realized more than \$200 with which new books

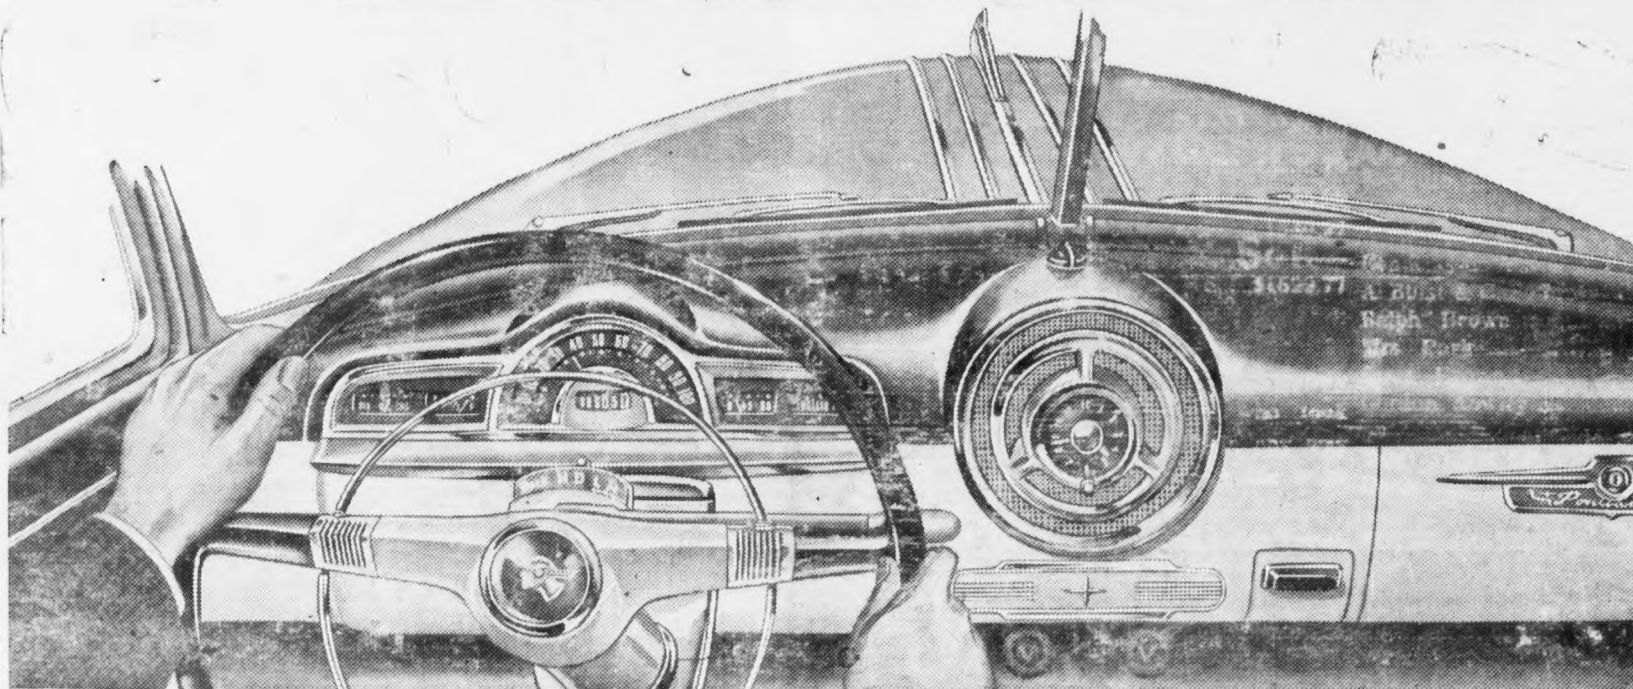

and library supplies will be purchased.

The Library Committee of the Home & School Association were John Appleyard, principal of the Carbon school; Mrs. Dick Sherring, Mrs. Ronald Neher and Mrs. J.A. Barr. All members helped with the remodelling and painting jobs and with the many teas, dinners and other events.

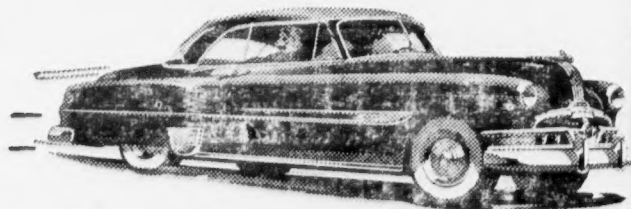

Drive It Yourself!

A GENERAL MOTORS VALUE

Take the wheel to get the feel of this amazing Pontiac...

There's only one way to fully appreciate a '52 Pontiac! That's to get behind the wheel and put it through its paces for yourself.

You'll thrill to its smooth, effortless driving ease, beautiful color harmonies and distinctive modern styling.

And whether you drive a Chieftain or Fleetleader, you'll find that the power of the high-compression Pontiac engines has been stepped-up to give wonderful new performance without sacrificing any of Pontiac's reputation for economy and durability. You'll also find a choice of silk-smooth Synchro-mesh transmission, dependable *PowerGlide automatic transmission in the Fleetleader Deluxe series or the spectacular new †Dual-Range Hydra-Matic Drive in Chieftains.

So, for the driving pleasure of your life—come in soon, and get behind the wheel of a Pontiac.

*PowerGlide is optional on Fleetleader Deluxe Models at extra cost.
†Dual-Range Hydra-Matic is optional at extra cost on the Chieftain Series.
